**DiGi's Revenue Up 14% To RM2.36 Billion**  
*Steady growth for the first half of 2008*

SHAH ALAM, 22 July 2008: DiGi.Com Berhad ("DiGi") recorded revenue of RM2.36 billion in the first half of 2008, a growth of 14% compared to the corresponding period last year.

The growth of 14% was attributed to higher usage arising from innovative product and service offerings which in turn strengthened average revenue per user ("ARPU") to RM59, up from RM58 in the first half of 2007. As of 30 June 2008, the Group's subscriber base stood at 6.6 million.

DiGi Chief Executive Officer Johan Dannelind said: "In the second quarter, we further affirmed our value proposition with innovative campaigns that encouraged higher usage and grew our revenue.

"We kept our promise of best value in mobile offerings with simple and easy to use services. Customers should expect even more compelling products and services from us in the coming months in light of mobile number portability and growing competition."

The Group's earnings before interest, tax, depreciation and amortisation ("EBITDA") improved by 11% to RM1.11 billion compared to RM999 million in 2007. The growth was mainly driven by higher revenue while pressure from higher traffic charges shaved the EBITDA margin by one percentage point to 47.2% compared to last year.

For the six month period, the Group posted profit before tax ("PBT") of RM800 million, an increase of 17% against RM684 million recorded in 2007. Profit after tax ("PAT") grew by 19% to RM589 million from last year as a result of strong operational performance and one percentage point saving in statutory tax rate. Earnings per share hence increased to 77.6 sen against 66.2 sen previously.

On the future of DiGi, Dannelind who took over the helm four months ago, explained: "I am pleased that we remained focused in our strategies while at the same time prudent in looking at ways to re-energise ourselves to stay ahead. We have great people whom I believe are our biggest asset in taking the company to the next level."

Moving forward, the Group is confident of tapping on growth opportunities arising from broadband.

Dannelind added: "We are committed to make mobile communication even more pervasive and personal through advanced data and broadband services, and will do our best to bring internet to the people through easy to use and innovative services by early next year."

DiGi will pay an interim single-tier exempt dividend of 57 sen per ordinary share for financial year ending 31 December 2008 on 28 August 2008. The entitlement date is on 12 August 2008.
